

IP/WIFI Entrance panel

NVE-EPV101KPWIFI

NVE-EPV101KPWIFI villa entrance panel is an elegant and aesthetic device designed for outdoor use, e.g. in front of the entrance to the property. It allows to easily communicate with the owner of the house using the bell button and the built-in color camera. IR illumination allows trouble-free use of the panel also at night. The built-in Unique 125 kHz proximity card reader and the numeric keypad allows to create a simple access control and facilitate the daily use of the system. Support for two relays allows to control both the wicket and the gate. The third relay allows to connect an additional bell. Thanks to the use of WiFi technology, the panel can also work autonomously with the Tuya Smart application and / or wirelessly with subscriber monitors.
